Poor hand washing technique revealed

At the heart of every WASH & GLOW kit is our next-generation UV Germ technology, through which microscopic UV-activated particles are safely deposited onto hands, to be removed by proper hand washing. These harmless, non-toxic particles in powder form, may be used on most surfaces, skin and clothing, making them ideal for Hygiene Awareness Training and Cross-Contamination / Cross-Infection Training.

## WASH & GLOW Professional Kit 2

This professional level Infection Control Resource kit will help you deliver highly memorable Hand Wash Training as well as implement Hygiene Compliance Testing and discreet UV Cleaning Audits. The UV tools in this kit will help you ensure the highest Environmental Health standards are set, monitored and maintained. Includes a HD Hand-Wash Training DVD.

## WASH & GLOW CheckPoint Trainer 2

If you need a powerful, lightweight and portable hand-washing training system, then the CheckPoint Trainer is the one for you. This Next-Generation solution comprises of a mains-powered CheckPoint Lamp and a 250ml bottle of WASH & GLOW Moisturising Lotion, securely housed in a high-quality custom carry case. Includes a HD Hand-Wash Training DVD.

## WASH & GLOW Mini-Training Kits

If you are on a tight budget or only have occasional training requirements, then consider a WASH & GLOW Mini-Training Kit, so you can still provide occasional essential training on how and why hands should be washed properly, but in a simple and affordable way. Refills available for all kits.

## WASH & GLOW Cross-Infection Training Kits

Introducing a range of affordable, practical teaching tools for Cross-Infection / Cross-Contamination Training. Using invisible, non-toxic, germ-emulating particles, the touch-transmission characteristics of microbes and contaminants may be easily demonstrated, in a fun and memorable way.

## WASH & GLOW Cleaning Audit Tools

A WASH & GLOW Cleaning Audit Kit removes the uncertainty of knowing if your hygiene-sensitive areas are as clean as you would expect. The kit comes complete with sterile, non-toxic UV surface markers that will invisibly mark key hygiene risk areas in your kitchens, toilets, surgeries and wards etc. If these areas are not being cleaned effectively, a follow-up inspection will confirm the non-compliance.
